

## SERVICE UPDATE

Have your cylinder heads machined on the latest in technology.

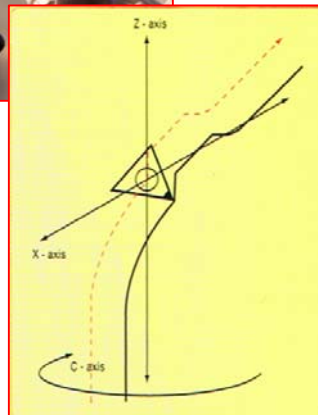

**INTRODUCING THE  
LATEST AUTOMOTIVE CNC TECHNOLOGY**

**NEWEN<sup>®</sup>**  
FIXED TURNING

**CONTOUR**

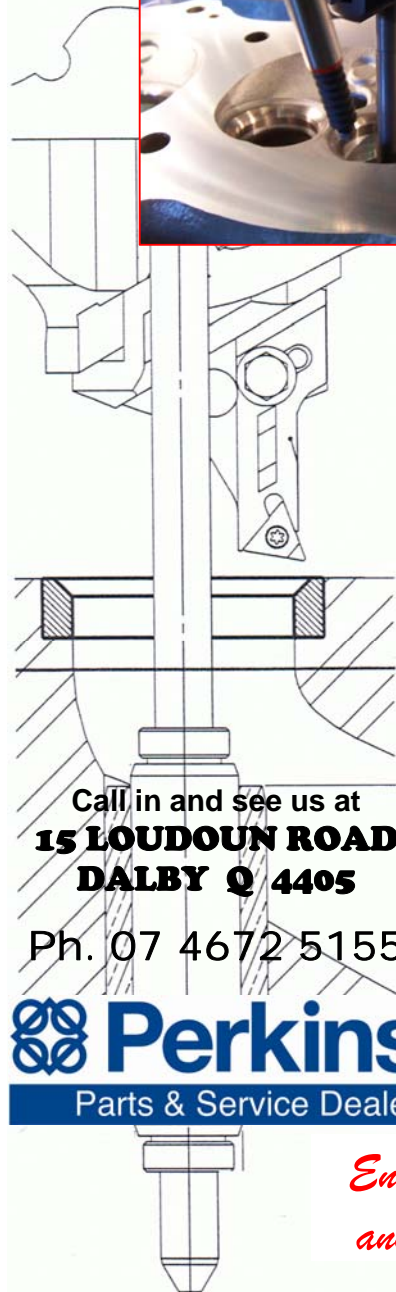

Your valve seats can now be machined on the latest single point CNC fixed turning machining centre.

This major investment guarantees you perfect valve seat concentricity and superior surface finishes for a perfect seat seal and heat dispersion.

With up to 300 times less cutting effort hardened sintered valve seats can now be machined with ease. Micro chatter marks and underlations are virtually impossible to generate.

New touch screen computer technology allows us to profile any valve seat or port design giving you improved gas flow and engine performance.
